Professional Experience

pflegetech | Senior Software Developer

December 2023 - present | Germany (Remote)

- Lead frontend development of Logensa SaaS, ensuring HIPAA, GDPR, and data privacy compliance.
- Contributed to backend with NestJS, ensuring seamless integration and efficient data flow.
- Built scalable, responsive UIs with UX and backend teams for healthcare workflows.

Cocoon | Senior Full Stack Developer

November 2021 - December 2023 | United Kingdom (Remote)

- Developed 7 projects using React, Next.js, Gatsby, Firebase, and more.
- Lead frontend architecture and code reviews to ensure consistency and quality.
- Contributed to backend with Node.js, Express, Shopify, and CRMs for full-stack delivery.

Creative Business Group | Full Stack Developer

October 2020 - November 2021 | Bangladesh (On-site)

- Developed frontend and backend for a SaaS Call Management System to optimize customer communication.
- Built React Native features for real-time call handling and notifications.
- Built scalable APIs with Node.js and Express for smooth data sync.

Doatkolom | Full Stack Developer

January 2018 - October 2020 | Bangladesh (Remote)

- Built scalable, responsive frontends using modern JS frameworks and tools.
- Built custom, dynamic UIs with ReactJS for intuitive editing experiences.
- Integrated Firebase and Algolia in backend services using Node.js and Express.

Skills

Frontend - JavaScript, React JS, Next JS, Gatsby JS, TypeScript, React native, Redux, TanStack Query, React Native, Tailwind CSS, Ant Design, Bootstrap, Progressive Web App, Algolia

Backend - Node JS, Express JS, MongoDB, GraphQL, Firebase, Websocket, Nest JS

Dev Tools - Git, GitHub, Postman, Reactotron, Docker, Figma

Language

English - Proficient in English with strong communication skills for professional and technical collaboration.

Bangla - Native fluency with clear and confident communication across diverse professional and cultural contexts.

Education

BBA - 2022

Kendriya College, Dhaka, Bangladesh.

Finance and Banking

GPA: 3.12 / 4.0

Selected Projects

City App – Citizen Services Platform

Role: Front-End Developer(React native)

Built a citizen-focused Android app offering local services, news, and real-time alerts. Implemented push notifications, service requests, and event listings with an accessible, user-friendly interface for all age groups.

Abacus – Custom Built Statement Tables

Role: Fullstack Developer (Next.js, Node.js, MongoDB)

Built a real-time collaborative table builder for finance teams to track, edit, and visualize key metrics, with live data integration, autosave, and versioning across frontend and backend.

Bocklight – Commercial Lighting Product

Role: Fullstack Developer (Next.js, Node.js, MongoDB)

Built a 3D-enabled B2B platform for lighting product previews. Developed both frontend and backend, migrated data via microservices from Strapi to MongoDB, and reduced redundant API calls to improve UX and customization speed.

MainGear – Custom PC Builder

Role: Fullstack Developer (React.js, Node.js)

Built an interactive gaming PC configurator with real-time validation, performance estimates, and admin-friendly content management, optimized for all devices.
